INTRODUCTION

Open Source Intelligence (OSINT) is the process of collecting, analyzing, and validating information obtained from publicly available sources. It is widely used in cybersecurity, digital forensics, threat intelligence, and investigations to verify claims without accessing private or restricted information.

This investigation was conducted in response to the claim that Nyekwere TamunoTonye Tom was once nominated as a judge for an Indomie Dance Competition. The purpose of this investigation was not to prove the claim true or false, but to determine whether sufficient publicly available evidence exists to support or refute it.

OVERBUILD

The investigation followed a structured OSINT methodology involving planning, Information gathering, scanning, source validation, analysis, reporting, documentation and conclusion. Information was gathered only from publicly accessible and legally available sources while maintaining the integrity of the collected evidence.

OBJECTIVES

Identify and collect credible public sources and evidence relevant to the claim.

Validate the credibility and reliability of each source.

Document the findings in a structured investigation report.

To determine using OSINT sources, whether the claim is Supported, Unsupported or Inconclusive.

SCOPE

This investigation was limited to publicly available information obtained through Open Source Intelligence (OSINT) techniques. Sources included search engines, news websites, social media platforms, archived web pages, professional networking sites, and publicly accessible organizational websites.

The investigation did not involve unauthorized access, or confidential information.

TOOLS USED:

1. Social media (Facebook, Instagram, LinkedIn)
2. Wayback machine
3. Microsoft word

4. OSINT framework
5. Google search engine

METHODOLOGY

The investigation was conducted in five phases:

PLANNING

Where we defined the investigation objectives, Identified the scope, Selected OSINT tools, Assigned responsibilities.

INFORMATION GATHERING

Here all information that could be relevant in analyzing the claim was gathered, we performed keyword and advanced search queries, identified relevant public sources, collected webpages, articles, social media posts, and publicly available records.

SOURCE VALIDATION

In this phase, the information gathered by each source was evaluated using the following criteria:

1. Authority
2. Accuracy
3. Currency
4. Objectivity
5. Corroboration

ANALYSIS

Here information obtained from the multiple sources was compared, we identified supporting and conflicting evidence. and determined whether sufficient evidence existed.

REPORTING

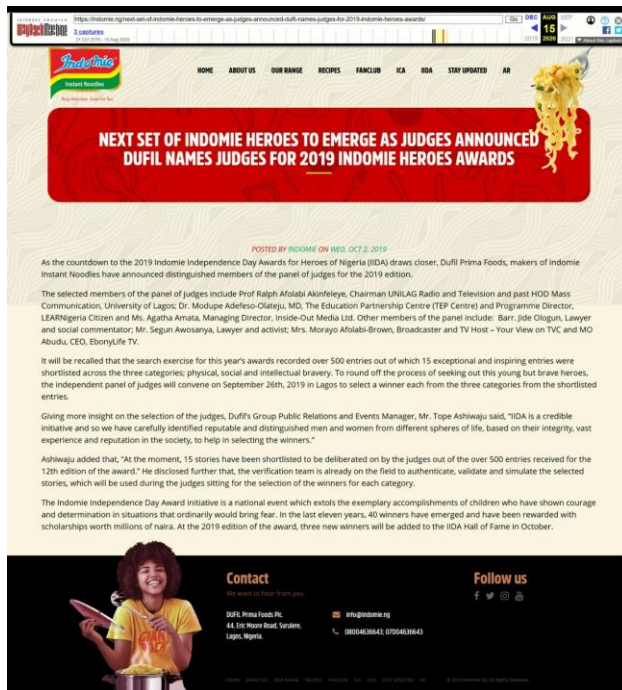

- We documented findings.
- Prepared evidence logs and Proceeded to the final investigation report.

FINDINGS

The investigation established that:

Indomie Nigeria has organized and sponsored several promotional competitions over the years. Public records confirm that judging panels were appointed for certain Indomie competitions.

As gotten from the snapshot of their website blog gotten from wayback machine

Some campaigns from Google search engine included dance related competitions and talent events. But none however showed any nominations for Judges in INDOMIE DANCE where Nyekwere Tamunotonye Tom was mentioned.

However, no credible publicly available evidence was found confirming that he was nominated as a judge for an Indomie Dance Competition.

SOURCE VALIDATION:

SOURCES	AUTHORITY	ACCURACY	CURRENCY	OBJECTIVITY	CORROBORATION
Google Search	HIGH	HIGH	HIGH	It is a neutral search platform.	HIGH as finding is verified using original sources and articles checked with official announcements.
Wayback machine	HIGH	HIGH	LOW: cause information gotten from this source is dated as far back to 2019.	Preserves historical web pages without altering their content.	HIGH
Facebook	MODERATE	HIGH: Official pages are generally reliable; personal posts require verification	HIGH	HIGH	Compared with employer or organization websites: HIGH
LinkedIn	HIGH for professional profiles of which his is one.	Information is self reported but often verifiable.	HIGH	HIGH: It is a professional networking platform.	HIGH
Instagram	MODERATE	MODERATE	MODERATE	MODERATE: Promotional and personal content.	LOW as not much information was stated here.

RISK ANALYSIS

During the investigation, the following challenges and risks were identified:

- Limited historical records for older promotional events.

- Social media posts may have been deleted or made private.
- Archived webpages were incomplete or unavailable.
- Some search results lacked sufficient context or corroborating evidence.

These factors reduced the ability to definitively verify the claim.

RECOMMENDATION

To improve confidence in future investigations, it is recommended that one should consult official Indomie Nigeria archives or media departments, obtain archived promotional materials where available, preserve digital evidence immediately after discovery and continue monitoring public sources for newly available information.

IN CONCLUSION:

The investigation applied standard Open Source Intelligence techniques to determine whether sufficient publicly available evidence exists regarding the claim. Although evidence confirmed that Indomie has organized dance related competitions and appointed judges for some promotional events, no credible public evidence was found linking **Nyekwere TamunoTonye Tom** to the role of judge for an Indomie Dance Competition.

Therefore, based on the available evidence, the claim is assessed as **inconclusive**.

BONUS QUESTION RESEARCH INFORMATION

Professional Activity Timeline of Nyekwere Tamunotonye, Identified in Cybersecurity and Ethical Hacking, Threat Intelligence, and Public Awareness Activities

2021

Nyekwere Tamunotonye began building a visible presence within the cybersecurity community through participation in awareness campaigns, cyber defense initiatives, and public education.

Activities

February 2021: Participated in the Safer Internet Day (SID) 2021 Campaign Execution, contributing to cybersecurity awareness efforts.

September 2021: Participated in the launch of the Intensive Cyber Defense Program, demonstrating continued engagement in cyber defense education and capacity development.

1 September 2021: Published a cybersecurity course on Selar, providing educational resources for individuals interested in cybersecurity.

Published a Facebook post titled "Hackers on the Rampage and Bank Fraud on the Rise," discussing cyber threats and financial fraud trends to promote public awareness.

2022

During 2022, Nyekwere Tamunotonye continued participating in cybersecurity outreach and educational initiatives.

Activities

8 February 2022: Participated in the Safer Internet Day 2022 Youth Law Enforcement Panel, supporting discussions on online safety, cybersecurity, and youth engagement.

15 February 2022: Published a free cybersecurity training initiative aimed at improving cybersecurity knowledge and awareness.

2023

Nyekwere Tamunotonye remained active in public cybersecurity awareness programs.

Activities

Participated in the Safer Internet Day 2023 Outreach and Quiz Competition, promoting cybersecurity awareness and digital literacy.

2024

Nyekwere Tamunotonye continued contributing to online safety initiatives through national awareness campaigns.

Activities

Participated in the Safer Internet Day 2024 Child Online Protection Initiative, supporting efforts focused on protecting children in digital environments and encouraging safer internet practices.

2025

Nyekwere Tamunotonye maintained active involvement in cybersecurity awareness programs, with a growing focus on artificial intelligence and digital safety.

Activities

Participated in the Safer Internet Day 2025 AI and Digital Safety Awareness campaign, contributing to discussions surrounding responsible AI use, cybersecurity, and digital resilience.

2026:

As of date Nyekwere Tamunotonye remains a cyber security and ethical hacking instructor at NIIT port Harcourt, where he specializes in cyber security training and awareness programs, also actively serving as a mentor to his students, he newly launched his Cybersecurity Virtual Mentorship and internship program.
